

**Purpose**

The purpose of this policy is to ensure that Arslan Alüminyum A.Ş. contributes to environmental sustainability by enhancing energy efficiency across all its operations. Our core objectives are to reduce energy consumption, promote the utilization of renewable energy sources, and minimize adverse environmental impacts.

Scope

This policy encompasses all production facilities, operational areas, employees, suppliers, and business partners of Arslan Alüminyum A.Ş.

Responsibilities

- Top Management: Responsible for the determination, implementation, resource allocation, and continual improvement of energy policy objectives.
- Energy Management Team: Responsible for monitoring and reporting energy performance, and executing continuous improvement activities.
- Employees: Obligated to prioritize energy efficiency in their daily operations, engage in energy-saving behaviors, and comply with relevant practices and protocols.
- Suppliers and Business Partners: Expected to operate in alignment with the company's energy efficiency targets.

Principles and Commitments

1. Energy Efficiency We develop energy-efficient technologies and practices to reduce energy consumption in both production and support processes. We systematically monitor, measure, and improve our energy performance.
2. Renewable Energy Utilization To reduce fossil fuel dependency, we promote the utilization of renewable energy sources—such as solar, wind, and similar alternatives—and actively invest in this field.
3. Environmental Sustainability We implement rigorous measures to minimize carbon emissions, waste, and pollution in order to mitigate the environmental impacts of our energy consumption.
4. Employee Training and Awareness We conduct regular training sessions and awareness campaigns to enhance our employees' competencies and awareness regarding energy efficiency.
5. Energy Management System We establish and maintain an Energy Management System compliant with national and international standards. We systematically monitor and evaluate our energy use, aiming for continual improvement through planned internal and external audits.

**Implementation**

- Energy Targets: Measurable targets are established annually to reduce energy consumption and mitigate our carbon footprint.
- Supplier Compliance: Suppliers and business partners are strongly encouraged to align their operations with our energy policy.
- Innovative Technologies: R&D activities are supported to research and deploy innovative technologies that enhance overall energy efficiency.

Monitoring and Review

The energy policy is reviewed at least once a year. The effectiveness of the policy is evaluated by tracking Energy Performance Indicators (EnPIs). Necessary revisions are executed upon approval and systematically communicated to all personnel.
