

Purpose

The purpose of this policy is to ensure that Arslan Alüminyum A.Ş. conducts its operations sustainably in accordance with environmental, economic, and social responsibility principles, to optimize resource utilization, to enhance social benefit, and to support long-term sustainable growth.

Scope

This policy encompasses all operational areas of Arslan Alüminyum A.Ş.—including aluminum billet casting, extrusion, profile production, and associated support processes. Furthermore, it applies to the company's employees, executives, suppliers, customers, and other stakeholders.

Responsibilities

- Top Management: Responsible for the determination, implementation, and performance monitoring of sustainability strategies.
- All Employees: Obligated to adopt sustainable practices in their daily operations and comply with the policy's requirements.
- Relevant Departments: Responsible for implementing, monitoring, and reporting targets in areas such as energy efficiency, environmental management, and occupational health and safety (OHS).

Principles and Commitments

1. Environmental Responsibilities Arslan Alüminyum is committed to minimizing the environmental impacts of its production processes. The fundamental priorities include:

- Increasing energy efficiency,
- Reducing waste generation,
- Investing in renewable energy sources,
- And ensuring the sustainable use of natural resources.

2. Effective Resource Utilization The efficient, economical, and sustainable use of natural and economic resources is essential. Raw material consumption is optimized, and recycling practices are supported.

3. Human Rights and Occupational Health and Safety Arslan Alüminyum respects the rights of its employees and provides safe, healthy, and equitable working conditions. Strict compliance with occupational health and safety standards is ensured, and employee development is continuously supported.

4. Social Contribution The company supports the well-being of the communities in the regions where it operates. It contributes to social responsibility projects, promotes local development, and establishes long-term relationships with stakeholders.

5. Innovation and Continuous Improvement Arslan Alüminyum develops innovative approaches in its production and management processes, continuously improving its environmental and social performance. Continuous development is targeted in the areas of energy management, waste reduction, and efficiency.

SUSTAINABILITY POLICY

POL 44

2 / 2

Implementation

- The sustainability policy is communicated to all employees and integrated as a core part of the corporate culture.
- Sustainability awareness is disseminated through training and awareness campaigns.
- Stakeholders within the supply chain are also encouraged to operate in accordance with these principles.

Monitoring and Review

- The company's sustainability performance is regularly monitored, measured, and reported.
- Compliance with international sustainability standards (e.g., GRI or ISO 14001) is strictly observed.
- The policy is reviewed and updated at least every 5 years, or as deemed necessary.

Effective and Review Dates

Effective Date: 12.02.2026

Review Date: 12.02.2027
