Turkish aluminum giant "Arslan Alüminyum" raised 3 steps at once in ISO 500 List.

President of the Board Mehmet Arslan:

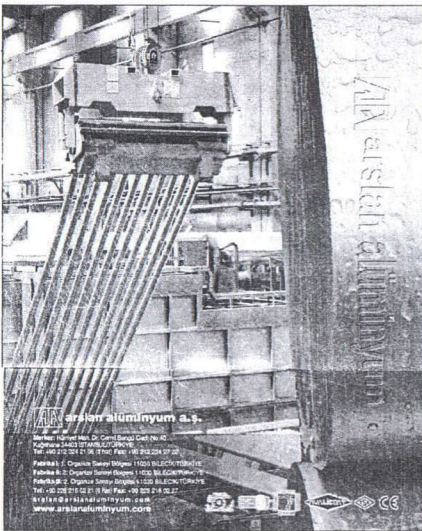

"We target reaching a production volume of 180 000 tons/year in year 2021"

By Cafer Elmas

While Istanbul Chamber of Industry (ISO) was announcing the resulting report of the "500 largest Enterprises of Turkey" research, revealing the most

valuable data of the industrial sector, Arslan Alüminyum AŞ, one of our city's pioneering and important enterprises, raised 3 steps at once in 2019 with respect to the last year. With its solid structure and the investments it has made since its foundation,

Arslan Alüminyum, the strongest and most reliable representative of the Turkish aluminum industry in local and global markets, continues its relentless growth.

"We target reaching a production volume of 180 000 tons/year in 2021"

the company raised 3 steps at once among the 500 largest enterprises in Turkey, a list made by ISO, Istanbul Chamber of Commerce with the sales it effectuated from its production.

"We go on with our investments continuously"

Mehmet Arslan, President of the Board of Arslan Alüminyum AŞ., stated "We go on with our investments continuously in order to become an international representative growing fast in our country as well as in the world markets.

When you know how to love your country, how to concentrate on production and how

to act as an exporter, all the moves you make end up in success and your vision shapes up accordingly.

Thanks to the new cupola furnaces planned to take into operation in our Bilecik smelter facilities, we target reaching a production volume of 180 000 ton/year in year 2021.

Thanks to this important investment move, Arslan Alüminyum A.Ş. will keep on being the fastest growing and strengthening company within its sector.

As Arslan Alüminyum A.Ş., we make investments believingly in becoming a global player in the world markets when it comes to aluminum production.

Even in 2020, a period when the Covid-19 pandemic made a great impact on the global trade, Arslan Alüminyum AŞ works relentlessly in order to complete the investment decisions taken.

The most important condition of becoming a global player and to contribute to the country's exports and future is to work and challenge without a break."

Thus, the investment giant of the global aluminum market Arslan Alüminyum A.Ş. gave the signals to its rise among the ISO 500 giants will be even faster when the investment process will be complete.

Arslan Alüminyum AŞ, the glowing star of the Turkish aluminum sector, representing one of the strongest aluminum production forces in the world, became a giant. Thanks to its sales in the national market and its export oriented growth strategy,
