1 Purpose

Arslan Alüminyum A.Ş. aims to contribute to environmental sustainability by enhancing energy efficiency. This policy outlines the necessary steps to reduce energy consumption, promote renewable energy sources, and minimize negative environmental impacts.

2. Scope

This policy applies to all production facilities, employees, suppliers, and business partners of Arslan Alüminyum A.Ş.

3. Fundamental Principles

3.1. Energy Efficiency

We develop and implement energy-efficient technologies and practices in our production processes to minimize energy consumption. We regularly monitor and optimize our energy efficiency performance under the principle of continuous improvement.

3.2. Renewable Energy Sources

We invest in and promote the use of renewable energy sources to reduce fossil fuel consumption. We strive to meet our energy needs from solar, wind, and other renewable sources whenever possible.

3.3. Environmental Sustainability

We take measures to reduce carbon emissions and other harmful waste to minimize the environmental impact of our energy consumption. Our energy policy is designed in line with our environmental sustainability goals.

3.4. Employee Training and Awareness

We educate our employees on energy efficiency and sustainable energy practices, raising awareness on these issues. We encourage all employees to contribute to energy efficiency.

3.5. Energy Management System

We establish an energy management system in compliance with national and international standards, regularly monitoring our energy usage and continuously improving our performance. We conduct regular energy audits to evaluate the effectiveness of our energy policy.

4. Implementation

- **Energy Targets:** Each year, we set specific targets to reduce energy consumption and our carbon footprint and take the necessary steps to achieve these goals.
- **Supplier and Partner Compliance:** We expect our suppliers and business partners to act in accordance with our energy policy. We promote energy efficiency within our supply chain.

HAZIRLAYAN	ONAYLAYAN
R&D AND QUALITY ASSURANCE MANAGER	DEPUTY GENERAL MANAGER

- **Innovative Solutions:** We support R&D efforts to research and implement innovative technologies that will enhance energy efficiency.

5. Responsibilities

- **Management:** Senior management is responsible for the implementation and continuous improvement of the energy policy.
- **Employees:** All employees are required to contribute to energy efficiency and act in accordance with our energy policy.

6. Review

We review our energy policy annually and update it as necessary. During this process, we assess our energy efficiency performance and improve our energy management practices.

7. Conclusion

Arslan Alüminyum A.Ş. expresses its commitment to energy efficiency and environmental sustainability through this policy. We are dedicated to rigorously applying and continuously improving this policy in all our activities.
